

## Topline Questionnaire

Fall, 2016

*N=714 Detroit residents. Interviews were administered online as well as using paper and pencil between October 2016 and January 2017. Respondents were recruited via mail, phone, and in-person from a representative address-based sample of the city. The margin of sampling error for a random sample survey of this size is 3.7 percentage points at the 95% confidence level. The data have been weighted using a raking procedure<sup>1</sup> by age, education, sex, and race to match Census estimates for the City of Detroit.*

**INTRODUCTION:** Your participation in this study is completely voluntary. You may skip any question that you do not wish to answer. However, your participation is important because it helps researchers understand how people perceive changes in the Greater Detroit Metropolitan area, and this information can be used to inform policy decisions affecting the area. When filling out this questionnaire, please remember there are no right or wrong answers, we are just interested in what you think. We take our promise of confidentiality very seriously. All of your answers will be kept strictly confidential. No personally identifying information will ever appear in any study report. If you find that you are disturbed by the content of any of the questions or if you have any questions about the study, please contact us at our toll-free number: 1-800-759-7947.
